A. Classifications by CBO Group

Base: *CBO1994-CBO2002_occup_group*.

Variables:

⇒ *occ_group_2* – Divides into 5 groups:

- (a) Professional
- (b) Technician
- (c) White Collar
- (d) Blue Collar Skilled
- (e) Blue Collar Unskilled

⇒ *occ_group_3* – Based on [Abowd et al. \(2001\)](#) (used in [Menezes-Filho et al. \(2008\)](#)). Divides into 4 groups¹:

- (a) High Skilled White Collar
- (b) Low Skilled White Collar
- (c) High Skilled Blue Collar
- (d) Low Skilled Blue Collar

⇒ *occ_group_4* – Based on [Reijnders and de Vries \(2017\)](#) (used in [Acemoglu and Autor \(2011\)](#)). Divides into 6 groups:

- (a) Manager
- (b) Professional
- (c) Production
- (d) Clerical
- (e) Sales
- (f) Services.

¹Originally, the authors define 5 groups, but an adaptation was made to 4 for the case of Brazil.

A.1. Procedure:

1. Map CBO1994 to ISCO1988 using [Menezes-Filho et al. \(2008\)](#)²
2. Create classifications based on ISCO1988.
3. Merge with CBO2002 using the CBO1994-CBO2002 conversion. The merge result is approximately 84%³:

Result	# of obs.	
not matched	380	
from master	380	(<code>_merge==1</code>)
from using	0	(<code>_merge==2</code>)
matched	1,973	(<code>_merge==3</code>)

⇒ Most of the classifications that did not merge are classified as "Outros" (e.g. "Outros Bombeiros")

B. COD - CBO Translation: Informality Share

Base: `COD.CBO_share_informality`.

⇒ This database contains the mapping of CBO to COD from the Continuous PNAD, as well as information on the informality share in each 4-digit occupation. The COD - CBO merge was approximately 72%⁴:

Result	# of obs.	
not matched	129	
from master	0	(<code>_merge==1</code>)
from using	129	(<code>_merge==2</code>)
matched	335	(<code>_merge==3</code>)

³[Machado et al. \(2021\)](#) attempted a direct mapping of CBO2002-ISCO1988, but this conversion was not complete. Only 1,388 of the 2,570 six-digit occupations were present in the conversion table provided by CONCLA-IBGE, slightly more than half of the total occupations (54%). See the paper for more details.

⁴This merger can be improved.
